

# GLORION

G L O R

An honest governance token on BNB Smart Chain.  
Lock to vote — not to earn.

Honest · Achievable · Step-by-step

Whitepaper · Version 1.0 · June 2026

# 1 What is GLORION?

---

GLORION (GLOR) is a community **governance token** on BNB Smart Chain (BEP-20). It gives holders a voice in the project's direction.

It is not a yield. It is not interest. It is not a promise of profit. The model is deliberately plain: you **lock** GLOR to receive voting power, you **vote**, and you **unlock** to receive back exactly what you locked.

A **voice**, not a reward. Locking GLOR never pays you extra tokens — it only gives you a say.

## 2 Philosophy — honest over hype

---

Three words guide every decision:

- **Honest** — no fake yield, no inflated APRs, no “get rich” talk. Everything is public and verifiable on-chain.
- **Achievable** — we only ship things that actually work today.
- **Step-by-step** — built slowly and transparently, one real step at a time.

GLORION is intentionally simple, because **simple = safe = auditable**. There are no hidden mechanics to misunderstand.

## 3 How it works

### 3.1 The token

Name / Symbol	<b>GLORION / GLOR</b>
Network	<b>BNB Smart Chain (BEP-20)</b>
Total supply	<b>500,000,000 GLOR — fixed, no minting</b>
Transfer tax	<b>0%</b>
Token contract (verified)	<b>0xFc8694FBB4ad731ff334b887c396C4bcE5F5d79B</b>

### 3.2 Staking for governance

The **GlorStaking** contract turns tokens into a voice in four steps:

- 1 Lock** — deposit GLOR for a chosen period of 1 to 12 months.
- 2 Voting power** — receive vGLOR, proportional to amount and duration.
- 3 Vote** — use your vGLOR on community proposals.
- 4 Unlock** — after the period ends, withdraw exactly what you locked.

$$\text{voting power} = \text{locked amount} \times (\text{months} / 12)$$

Example: lock 1,000,000 GLOR for 12 months → 1,000,000 vGLOR. Lock the same amount for 6 months → 500,000 vGLOR. Longer commitment, stronger voice.

The GlorStaking contract has **no owner and no admin functions** — no one can pause it, drain it, or change it. The token address is **immutable**, it uses **SafeERC20** and a zero-address guard.

Contract (verified): `0x3148A452506e1d59D76868B8dC463D3c15D0b42d`

### 3.3 Where voting happens

Governance runs on **Snapshot** (gas-free signaling) at [snapshot.org/#/s:glorion.eth](https://snapshot.org/#/s:glorion.eth). A contract-call strategy reads each address's voting power **directly from GlorStaking on BSC** — so your on-chain lock is your real weight. Nothing is counted that is not provable on-chain.

## 4 What the community decides

---

Governance grows in three tiers, from the concrete to the aspirational:

- **Tier 1 — Project decisions**

What to build next: logo, liquidity, whitepaper, features, listings.

- **Tier 2 — Spotlight**

Which community contributions, creators, or projects GLORION highlights and supports with visibility.

- **Tier 3 — Community giving**

Directing a share of community energy toward causes the holders choose together.

The first live proposal — “**What do we build first?**” — is already running on Snapshot.

## 5 Transparency & addresses

---

Everything is public and verifiable on-chain:

GLOR token (verified)	<b>0xFc8694FBB4ad731ff334b887c396C4bcE5F5d79B</b>
GlorStaking v4 (verified)	<b>0x3148A452506e1d59D76868B8dC463D3c15D0b42d</b>
Snapshot space	<b>snapshot.org/#!/s:glorion.eth</b>
Liquidity (PancakeSwap V2)	<b>0x464a98393cC608aAD20D6E36C18f596945B7c0AF</b>
Website	<b>gloriontoken.com</b>

Liquidity added to the pool is treated as a **permanent commitment** — it is never withdrawn. No rug-pull.

## 6 Honest risks

---

We will not pretend this is risk-free. Read this carefully:

- ! **Experimental & self-reviewed.** The contracts passed our own security review (reentrancy-safe, SafeERC20, no backdoors), but a paid human audit has not yet been done. It will come before the amounts involved grow meaningfully.
- ! **Shallow liquidity.** The current pool is small; even small trades move the price significantly.
- ! **Early & small.** GLORION is a young project with a small community. Treat any participation as experimental.
- ! **No profit promise.** GLOR is a governance instrument, not an investment. Nothing here promises any financial return.

**Stay safe.** Never share your seed phrase. Never connect your wallet to unsolicited links. GLORION will never ask you to do either.

This is a living document. It may be revised over time, including by community governance.

Honest · Achievable · Step-by-step
